From the newly added art the best reference is WO 00/28807, which discuss reference US 5,595,662 as having a polyether block copolymer hydrophilic membrane that is distinct from his membrane (see page 2, lines 3-20), which patent is derived from the same parent as the current application, which has an earlier filing dater than the priority document corresponding to the WO 0028807. The later WO reference teaches a pervaporation device including the nonporous hydrophilic membrane, the use in a growing container, e.g to growth a plant seed or in combination with a growing medium is not suggested.
